

## Three *Simple* Steps:

*Xpress Nebs* stocks your office with the respiratory equipment you choose.

*The Physician* prescribes the equipment and fills out a one-page form.

*The Patient* goes home with the equipment, we bill the patient's insurance and follow up with them.

*When a patient has a need, you simply supply the solution.*

We provide a service allowing you to get respiratory equipment in the hands of your patients at the point of diagnosis, at no charge to your facility.

## Products provided through our program:

Adult Nebulizers, Pediatric Nebulizers, Portable Nebulizers, Spacers and Peak Flow Meters
